

## CACI - Hypothyroidism Worksheet

(Updated 04/26/2023)

To determine the applicant's eligibility for certification, the AME must review a [current, detailed Clinical Progress Note](#) generated from a clinic visit with the treating physician or specialist **no more than 90 days before** the AME exam. If the applicant **meets ALL the acceptable certification criteria** listed below, the AME can issue. Applicants for first- or second- class must provide this information annually; applicants for third-class must provide the information with each required exam.

AME MUST REVIEW	ACCEPTABLE CERTIFICATION CRITERIA
Treating physician finds the condition stable	<input type="checkbox"/> Yes
Symptoms and signs	<input type="checkbox"/> None of the following: fatigue, mental status impairment, or symptoms related to pulmonary, cardiac, or visual systems
Acceptable medications	<input type="checkbox"/> Levothyroxine sodium (Synthroid, Levothyroid), porcine thyroid (Armour), liothyronine sodium (Cytomel), or liotrix (Thyrolar)
TSH 9.9 (uIU/mL or mIU/L) or less within the last one year	<input type="checkbox"/> Yes

### AME MUST NOTE in Block 60 one of the following:

- CACI qualified hypothyroidism. (Documents do not need to be submitted to the FAA.)
- Has current OR previous SI/AASI but now CACI qualified hypothyroidism.
- NOT CACI qualified hypothyroidism. I have deferred. (Submit supporting documents.)
